Solution Exchange LLC

Data Migration Solution for SAP Archives
Secure. Documented. Controlled.

By Jochen Hager

SolutionXchg offers premier software for the North American SAP® enterprise software market. We have partnered with KGS Software to offer KGS Migration4ArchiveLink, a tool that allows for an easy migration of SAP ArchiveLink™ and SAP ILM stored data from one storage platform to another. SolutionXchg is your partner when it comes to implementing KGS Migration4-ArchiveLink, developing a migration strategy and supporting your organization during the actual migration. Our experience and exceptional service guarantee a successful migration.

Migration4ArchiveLink: the low-risk, high-data availability solution for SAP document and data migration

In today's data-centric world, migrating legacy archives to take advantage of more cost-effective, efficient and stable alternatives is a top priority for the business community.

For good reason. With each passing day, the excessive operational and legal exposure risks these aging systems represent threaten to undermine the vital work processes that are central to smoothly functioning business operations.

Yet traditional methods for migrating data to new archival systems tend to be disruptive, frequently culminating in high-risk "migration weekends" that rely upon months of flawless planning and execution.

It's a high stakes process without a lot to like.

Ease of Use
Seamless Transition

At SolutionXchg, we believe migrating archival records shouldn't be so complicated. Or filled with so many business risks.

Unlike traditional migration solutions, KGS Migration4-ArchiveLink enables businesses to immediately transition to a new target archive, with data migration continuing in the background via a proxy server-based process that is transparent to end users.

▸ **Full access to archival data throughout the migration process, regardless of where the data resides** (target or source archive).

▸ **100% rollback capability at any stage in the migration process.**

▸ **Complete process control, including error/ exception notification and management.**

▸ **Thorough safeguards and audit trails to ensure regulatory and legal compliance.**

Normal work routines continue as Migration4ArchiveLink ensures data migrations are carried out safely

and securely, without performance impacts on SAP production servers or business operations.

It is the lowest risk, highest data availability solution for migrating SAP archives on the market today.
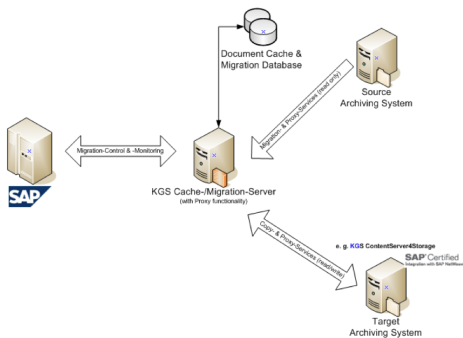

> **"Migration is a very sensitive IT topic. The effort requires extreme diligence while being conducted with the appropriate swiftness. All steps have to be documented very carefully. We have refined the procedure many, many times to provide the highest level of safety!"**

Safety and Control
Built-in Auditing

KGS Migration4ArchiveLink puts control over the data migration process where it belongs — into the hands of IT personnel. Its web-client interface provides authorized users with easy access to detailed status and progress reports on the migration process; error reporting and exception management capabilities; as well as intuitive configuration controls and migration management capabilities.

Clear audit trails and automatic step-by-step documentation of all migration events, traceable down to the individual document level, conform to widely accepted accounting principles and ensure regulatory and legal compliance.

System Highlights

▸ **Step-by-step documentation of all migration events, traceable down to the individual document level.**

▸ **Audit trails that conform to common accounting principles and ensure compliance with regulatory and legal mandates.**

▸ **Proactive monitoring with e-mail error notifications, backed by robust exception management capabilities.**

▸ **Immediate use of new target archive, with transparent access to all documents and data regardless of where it resides.**

▸ **No performance penalties, workplace disruptions or high-risk migration weekends.**

Optionally, random sample verification techniques further document migration integrity and compliance.

With minimal administrative effort, KGS Migration4ArchiveLink delivers migration success without the risks associated with proprietary server- or process-dependent migration solutions.

KGS Software
A Safe Choice

Worldwide, leading businesses rely on KGS archiving and document management solutions to manage complex business challenges.

Since 2005, KGS has been SAP's global outsourcing partner for SAP ArchiveLink and SAP BC-ILM interface certifications, and a SAP Value Added Solutions Partner.

SolutionXchg is a KGS preferred service and solution partner, providing easy access to all KGS solutions in the US.
